An Introduction to Multilevel Models 1.1 Hierarchically structured data Many kinds of data, including observational data collected in the human and biological sciences, have a hierarchical, nested,orclustered structure. For example, animal and human studies of inheritance deal with a natural hierarchy where offspring are grouped within families.

Introduction to Multilevel Modeling

Multilevel models (MLMs, also known as linear mixed models, hierarchical linear models or mixed-effect models) have become increasingly popular in psychology for analyzing data with repeated measurements or data organized in nested levels (e.g., students in classrooms).
