Big Data: The Management Revolution

The big data revolution is changing the way we make business decisions, yet, it's difficult for established companies to instantly adopt big data. Established enterprises weren't built to change: they rely heavily on their well-rooted processes. They are also bound by their obligations to stakeholders and focused on staying effective. This makes the implementation of [...]

Revolutionary Weapon: Why Big Data Matters and How ...

big data cannot deliver the promised revolution. In this way, today's big data landscape resembles the early phases of the first industrial revolution, rather than the culmination of the second a century later. Realizing the second big data revolution will require fundamentally

The authors move on to the risks of big data which are numerous of course. Much discussed are the privacy of the data that is generated.

Amazon.com: Customer reviews: Big Data: A Revolution That ...

The revolution is in the data: The real revolution is not in the machines that calculate data but in data itself and how we use it. The amount of stored information grows four times faster than the world economy, while the processing power of computers grows nine times faster. A movie is fundamentally different from a frozen photograph.

Big Data Summary - Kim Hartman
