Roundabout Design Guidelines

Currently, there are approximately 20 roundabouts operating on the state highway system and over 300 roundabouts on local roads throughout the State. For many people, roundabouts are a new concept. This requires a tailored public involvement approach and a combined education and communications strategy. This site is designed to provide the traveling public, FDOT staff, and consultants with the tools and resources to help them work together and assist with the development of roundabouts.

Roundabout design is an iterative process. A well-designed roundabout achieves a balance of safety and efficiency. Good design is a process of creating the smooth curvature, channelization, and deflection required to achieve consistent speeds, well-marked lane paths, and appropriate sight distance.
