GeoMedia: Dynamic GIS Mapping Software for a Changing ...

Hi. I'm having a situation when consuming data, in a WMS version 2015 EP05, from a SQL Server Spatial database. I've published a FC and when I'm trying to see the data in that a browser I get a stange behavior: the features inside that FC that has specified SRID = 0 are visible and others that have a SRID = 3857 (for example) aren't.

Solved: WMS and SQL Server Spatial - Hexagon Geospatial ...

A secured feature class has four views that can be used in the GeoMedia environment. These views are optional and their visibility inside GeoMedia is determined by the database administrator. These views are as follows: Modified Features View (*_MODS) —S hows the features that have been modified.
