A spirit of control has its roots in fear. Those who are dominated by a spirit of control always act out of fear, not out of love. When such a person is in a leadership role, the results can be disastrous, resulting in broken relationships and even church schisms. Here are some signs of a controlling spirit: Assuming authority one does not have.

How to Recognize a Controlling Spirit - MaryAnn Diorio
Interface management is the essence of the project manager's role: To plan, coordinate, and control the work of others participating on a project team. This article examines how project managers can most effectively practice interface management. In doing so, it lists seven principles of interface management and discusses the application of organizational theory to project management ...

The Cranial Bowl – The Osteopathic Cranial Academy
The Gibbs free energy of adsorption of a prototypical anion to a graphene/water interface is determined by surface-sensitive spectroscopy and interpreted via molecular dynamics simulations to establish the adsorption mechanism, which is found to be qualitatively different from that operative for the air/water interface and probably representative of a general water/hydrophobe interface.

Mechanism of ion adsorption to aqueous interfaces ...
Interface Control Working Groups (ICWGs) can be effective mechanisms to publicize and manage interfaces with customer/user participation. Where multiple end users depend on your external interfaces, an ICWG may encourage active and constant participation, which will in turn promote consistency, prevent development of unnecessary interfaces, and ...

The initial description of motivational interviewing (MI), provided by William Miller in 1983, has evolved through both clinical experience and empirical research into the evidence-based practice it is known as today. Differing from more "coercive" methods for motivating change, motivational interviewing does not impose change, but supports it in a way which is congruent with the person ...
