Refrigeration & Air Conditioning (AC) Specialist

The main difference between refrigeration and air conditioning is that refrigeration, in general, refers to any process where thermal energy is taken away from a place and transferred to a place with a higher temperature. Air conditioning is a type of refrigeration where thermal energy is taken away from the air (typically in a room or a vehicle) in order to keep the air cooler. What is Refrigeration

Difference Between Refrigeration and Air Conditioning

The iPad Air is also a little thinner: While the standard iPad comes in at 0.29 inches thick, the iPad Air sits in at 0.24 inches. In use Both the standard iPad and the iPad Air offer very similar ...

New York HVAC Certification and License Requirements

Both air conditioning and refrigeration units depend on converting liquid to gas in the cooling process, but the manner in which they achieve this is different for each system. Air conditioners use something called an evaporator to convert a liquid to a gas. An evaporator is a small, narrow hole designed to change the pressure of a liquid so ...
