Nephrology And Urology In The

To summarize, nephrologists specifically treat diseases that affect the kidneys and their ability to function, such as diabetes or kidney failure. Urologists treat conditions of the urinary tract, including those that can be affected by the kidneys such as kidney stones and obstruction.

Nephrologist Vs. Urologist: What's the Difference ...

Urologists and nephrologists both treat kidney problems. Urologists are surgical specialists who focus on anatomical or structural disorders of the kidneys and urinary tract. They treat problems such as kidney stones, kidney blockages, and kidney cancer. Urologists are qualified to perform surgery and outpatient medical procedures to correct such conditions.
