## Nissan Yd25 Engine Problems

I've been looking through this forum and do not see too much complaints about the YD25 diesel engines. I've been watching this guy on Youtube that supposedly specializes in Nissan's and he doesn't have too many great things to say about this engine. Some of the things he highlights are. - Poor timing chain design with them snapping frequently.

## Nissan YD25 reliability - 4x4 Community Forum

Engine timing chains in all engines do suffer from wear as they are moving parts within the engine. However with the Nissan engine, the factory chain configuration is not adequate for the work that it is subjected to. The result therefore is premature wear in the chains. We recommend that the timing chains in the YD25 engine be inspected for wear when the engines have travelled 100,000 kilometres and every 40,000 km thereafter. These engines can have a worn chain but present no abnormal

All common rail YD25 engines from 2005 have duplex (double row) camshaft timing chains. The duplex camshaft timing chain is built for a 300,000 km service life. The fuel pump drive timing chain is simplex (single row) and is failing well before the camshaft timing chain. It is imperative that you know the status of your timing chain, When the chain brakes you have extensive internal damage to your engine. Dont risk it!!! Get the free check done. Oscilloscope Method. Manual Method

The common rail versions of this engine are referred to in Europe as DCi. The commonrail engines are used in the D40 navara, late model D22 navara and the R51 pathfinder. This is the engine referred to below. YD25DDTi High Power was developed in 2005 for the Nissan Navara (D40) and the Nissan Pathfinder (R51). It initially produced 126 kW (171 ...

## **Nissan YD engine - Wikipedia**

The Big Problem – A worn or broken timing chain can cause catastrophic engine failure, in some cases costing up to \$10,000 to repair. The Cause of the Problem – The early YD engines (YD22) were fitted with a duplex style timing chain from factory, timing chain failures in these engines were very rare. When they introduced the YD25 engine, that Duplex chain was replaced with a single row primary timing chain.
