The ORION Series of Chillers is basically divided into 2 main groups: "Chillers With Built-In Water Tanks" and "Chiller Units Without Built-In Water Tanks". Customers with facilities that already have a water tank can choose a chiller without a built-in water tank, and those who need to provide a direct supply of chilled water to their equipment can choose a chiller that has the water tank built in.

On some of the chillers, there is a sticker that gives a little more information about each of the alarms. On some chillers its on the lower panel just below the chiller disconnect. On others its on the inside of that panel with the disconnect on it. Can you look around for the sticker or in the Orion chiller book and give us more information?
