Petroleum Production Engineering

Petroleum production engineering is a subset of petroleum engineering . Petroleum production engineers design and select subsurface equipment to produce oil and gas well fluids. They often are degreed as petroleum engineers, although they may come from other technical disciplines (e.g., mechanical engineering, chemical engineering, physicist) and subsequently be trained by an oil and gas company.

This chapter provides petroleum engineering students and production engineers with some basic knowledge about production systems. A complete oil or gas production system consists of a reservoir, well, flowline, separators, pumps, transportation pipelines, and safety control systems. The reservoir supplies the wellbore with crude oil or gas.
