Europe (especially Germany, France and England) since the medieval era.

The History of the Green Movement - ThoughtCo

Green earth is a natural pigment used since the time of the Roman Empire. It is composed of clay colored by iron oxide, magnesium, aluminum silicate, or potassium. Large deposits were found in the South of France near Nice, and in Italy around Verona, on Cyprus, and in Bohemia. The clay was crushed, washed to remove impurities, then powdered.

Green - Wikipedia

More broadly, Green demonstrates that the history of the color is, to a large degree, one of dramatic reversal: long absent, ignored, or rejected, green today has become a ubiquitous and soothing presence as the symbol of environmental causes and the mission to save the planet.

The history of Greenland is a history of life under extreme Arctic conditions: currently, an ice sheet covers about 80 percent of the island, restricting human activity largely to the coasts.. The first humans are thought to have arrived in Greenland around 2500 BC. Their descendants apparently died out and were succeeded by several other groups migrating from continental North America.
