IBM® WebSphere® Application Server Community Edition ...

WebSphere Application Server Community Edition was a free-of-charge, certified Java EE 6 application server for building and managing Java applications. Until September 30, 2016, it was IBM's supported distribution of Apache Geronimo that use Tomcat for servlet container and Axis 2 for web services. Another difference from Apache Geronimo is that WASCE came with DB2 and Informix database drivers, better XML parser libraries and contained the latest patches from unreleased upstream versions. Ove

WebSphere Application Server Family (Editions Comparison)

Access more than 100 open source projects, a library of developer resources, and developer advocates ready to help. Build Smart. Build Secure.

Build Smart. Build Secure. IBM Developer

The WebSphere Application Server Community Edition isn't a real WebSphere application server. Its a "pimped" Apache Geronimo. I wouldn't count on seeing any IBM classes in the Community Edition that where present in your AIX WebSphere. I guess your options are: Throw everthing IBM specific out. Get at least the Express Edition.
